2. Time Saved Per Investigation

Task	Manual	SathyaNishta	How
Read annual report + financials	3–4 hours	~45 s	Financial Agent queries pre-parsed DB
News sentiment sweep (90 days)	45–90 min	~30 s	News Agent scans `news_articles`
Compliance & regulatory check	1–2 hours	~45 s	Compliance Agent queries violation DB
Earnings call transcript review	60–90 min	~30 s	Audio Agent queries pre-transcribed DB
Entity relationship mapping	2–3 hours	~10 s	Graph Agent uses Neo4j pre-built graph
Synthesis + final write-up	30–60 min	~30 s	Synthesis Agent + LLM report generation
Total per investigation	**8–12 hours**	**4 min**	**99.9% reduction**

3. Cost Reduced

```
// Retail investor -- 3
investigations/week
Time saved     = 3 x 10 hrs = 30 hrs/week
Opportunity cost = 30 x Rs.750 =
Rs.22,500/wk
Annual saving  = Rs.22,500 x 52
=> Rs.11.7 Lakh/year per investor
```

```
// Institutional -- 10 investigations/week
Time saved     = 10 x 10 hrs = 100 hrs/wk
Opportunity cost = 100 x Rs.8,000/hr
Weekly saving  = Rs.8,00,000
=> Rs.4.1 Cr/year per analyst seat
```

4. Revenue Recovered — Platform Impact

Key assumption: SathyaNishta integrates into ET Markets as a premium layer on MarketChatGPT. Even 1% conversion of ET's 1.4 Cr MAU to Rs.299/month is a material revenue unlock. ET's data moat makes this defensible.

```
// Conservative model (Year 1 B2C)
ET Markets MAU      = 1,40,00,000
Premium conv.  (1%) = 1,40,000 subs
Subscription        = Rs.299/month
MRR                 = Rs.4.19 Cr

=> Rs.50 Cr ARR @ 1% conv.
=> Rs.500 Cr ARR @ 10% conv.
```

```
// B2B: Brokers, MFs, PMS providers
Enterprise seats = 30 x Rs.2L/year

=> +Rs.6 Cr ARR (Year 1)

// Total Year 1 (conservative)
=> Rs.56 Cr combined ARR
```

5. Proposed Revenue Model
